25 November, 2020

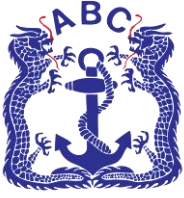

Dear Members,

The Hong Kong is still battling COVID 19 infections as the results of close contact without mask protection and large gathering. The club has been complying with all measures implemented by the Government and once again a few new measures are coming up which will affect the ABC slightly.

Not many changes from my last letter dated 16 November:

- Our Business hours remain unchanged for the time being.
- The temperature checking remains mandatory before entering the club or the pontoon area.
- Use our sanitizer as required and / or wash your hands regularly.
- Masks must be worn at all time when moving within the club premises this is mandatory.
- Access to the club will be rejected should you refuse to wear a mask or not having one.
- Only when eating or drinking and seated at a table can your mask be removed.
- Waiting at a table does not constitute an exemption for mask.
- Tables seating: No more than two persons may seat together at the bar; no more than four persons may seat together on tables in any other places including Middle Island.
- Still 2 guests per account, who **must** be registered by the Member on arrival at the temperature checking point.

- The swimming pool, and Snooker rules remain unchanged.
- Wearing a mask while exercising is not required in the gym.
- No guest allowed in the Gym.

- No more than four people are allowed at a time in the gym.
- The Saturday Live performances in the Four Peaks is now suspended.
- Maximum people per event or function is now reduce to 40 with all social distancing precautions and masks wearing practice applying.

Now the very new action that we are asked to promulgate to the Membership and their guests. You will see very soon a QR code at the entrances of the Club, please do your best to scan it each time you come in the Club and on departure.

This is not yet mandatory for you but it is for us to implement such tracking system. It will keep track of your visits and if a case of COVID 19 is found in our premises your will be automatically contacted by CHP for testing.

I take this opportunity as well to remind our Members that since the beginning of this pandemic, to keep our environment as safe as possible, the Club has been disinfected every day with 852 disinfection product.

Stay safe have a great weekend,

Sincerely yours,

Philippe de Manny General Manager
