Dear Members,

RE: New vaccine bubble for further facilities opening

I have received overnight to official documentation from the Government in regard to the new policies for more flexibility on our daily life.

The General Idea is that the more vaccinated people there will be the more opportunity we shall have to return to normality. Good concept but very difficult to implement specially with this Vaccine Bubble system imposing various level of vaccination of staff and Members alike.

There are 4 mode of operation A,B,C and D. each of them requiring various vaccination and registration level. I shall not elaborate on A as it does not concern our operation. A full description of those levels is explain on the website below. I can only encourage you to visit it as writing even a brief executive summary will take pages.

Our situation today puts us under the operating condition labelled B meaning:

- Four per tables
- 50% capacity
- Declaration of visit through Leave Home Safe apps or written visit registration.
- Temperature taking.
- Testing of our staff every 14 days
- 20 person per function still with social gathering separation.
- Party room such as our Junk limited to 4 people
- Gathering of people not exceeding 4.
- Proper air exchange.

As of today we are not in position to operate under C the next upgrade as not enough staff have receive their first shot of vaccine. We are now trying to improve this situation.

As soon as we reach a 50% in first vaccination we will be able to open various sections around the Club with table of 6.

There will be floor plans at the entrance of each outlets showing the areas and signs on table confirming the zoning.

We are intending to achieve C type of operation within a week and D within 40 to 50 days. Then It can only get better, if we all get vaccinated otherwise nothing will change.

Further more detail information will be sent shortly.

Your sincerely
