

HK Government – Positive COVID Test Advice

If you test positive using a rapid test kit provided by the government, don't take the bus to the emergency room and wait in line for a nucleic acid test. You can call vendor Hotline37008888.

The other party will send you home to do a saliva sample test with your family, stay at home, and wait for the manufacturer to confirm whether you have a move. There are no fees, manufacturers will charge the government.
